SAINT MICHAEL COLLEGE OF CARAGA
RESEARCH & INSTRUCTIONAL INNOVATION DEPARTMENT

ROUTING MONITORING FORM

Date Submitted	Chapter	Page No	Paragraph No	Feedback	Submitted By	Date Released	Route Number
2025-11-30	1	3	3	Rationale- state clearly why this study is important. Is there really a need for this? Convince your readers	Angeli Paquera - Panel	2025-11-30	Route 1
2025-11-30	2	5	2	Enhance your RRL. Make sure its coherent. Observe as well proper in-text citation	Angeli Paquera - Panel	2025-11-30	Route 2
2025-11-30	3	39	2	Include the ff: 1. Discuss how did you come up with the sampling of participants 2. Use APA format in your table 3. Discuss how will you modify the instrument? What variable/s? Indicators?	Angeli Paquera - Panel	2025-11-30	Route 2
2025-12-02	1	7	2	Observe proper indentions.	Ronie Ho - Panel	2025-12-02	Route 1
				Ask permission from the author of			

2025-12-02	2	39	2	your adapted research instrument.	Ronie Ho - Panel	2025-12-02	Route 2
2025-12-02	2	41	5	For research ethical standards follow this format: ETHICAL CONSIDERATIONS TEMPLATE GUIDE QUESTIONS A. Protection of Intellectual Property Rights (IPR) B. Informed Consent C. Data Privacy and Confidentiality D. Voluntary Participation and Freedom to Withdraw E. Minimization of Harm and Risk Management F. Beneficence and Contribution to Knowledge G. Justice and Fair Participant Selection H. Data Integrity and Accuracy I. Transparency and Honesty in Reporting J. Use of Patented or Copyrighted Materials K. Ethical Considerations for Animal and Human Trials L. Responsible Use of AI and Other Related	Ronie Ho - Panel	2025-12-02	Route 2

				Technologies M. Ethical Clearance and Institutional Approval			
2025-12-03	1	5	3	Please ensure consistency in the spacing and formatting of your Review of Related Literature (RRL). In the first paragraph of each cited literature, the spacing and alignment are not uniform. Some entries begin with extra spaces while others do not. Kindly review and standardize the formatting so that all paragraphs follow the same spacing and alignment style.	Ma. Evaliza Del Mar - Adviser	2025-12-03	Route 1
2025-12-03	2	45	13	Please ensure consistency in the spacing and formatting of your Research Ethical Standards specially in M. Ethical Clearance and Institutional Approval	Ma. Evaliza Del Mar - Adviser	2025-12-03	Route 1
2025-12-10	1	1	2	indent the start of the paragraphs	Beverly Jaminal - Panel	2025-12-10	Route 1
				RRL - start with the discussion of the			

2025-12-10	1	5	2	main topic and its ub variables. The profiling should only discussed on the last part of the RRL indent the start of the paragraphs check the paragraphs there are some ideas that are already a repetition	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-10	1	19	1	avoid having a one page -one paragraph. cut the paragraphs	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-10	1	26	2	RRL - follow rules on citation. do not start a paragraph parenthesis - apply to all add Literature on Curriculum enhancement implemented in the last part of the RRL	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-10	2	30	2	Theoretical framework - follow citation rules - indention of paragraphs	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-10	1	31	1	make sure you have literature support for your variables	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-10	2	37	2	Research locale - add relevant facts about SMCC and enhance your	Beverly Jaminal - Panel	2025-12-10	Route 2

				presentation of the CTHM department			
2025-12-10	2	38	1	2.3 should be in future tense use APA format for Table 1	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-10	2	40	1	indicate that the research instrument will undergo pilot testing	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-10	2	45	2	2.6 - indicate to whom are you going to ask permission and approval- state the office	Beverly Jaminal - Panel	2025-12-10	Route 2
2025-12-12	1	2	1	“Graduate outcomes—employment, job-program match, roles, and earnings—are key indicators of program quality in tourism and hospitality education.” Precious, your introduction begins with a general statement but does not adequately transition from a global to a national and finally to a local context. Strengthening deductive flow will help readers understand how broader issues lead	Dominic Abarquez - Panel	2025-12-12	Route 1

				to the specific need for a tracer study at SMCC. SMCC guidelines require beginning broadly and narrowing logically toward the institutional gap.			
2025-12-12	1	2	2	“International data further underscore the centrality of graduate outcomes… reports showing that about (88% of 2022/23 Graduates in Work or Further Study | HESA, n.d.)…” Although the paragraph includes relevant statistics, the studies are presented in a listing manner rather than synthesized. Your discussion should highlight common themes across international tracer findings instead of enumerating each study. SMCC guidelines emphasize synthesis over summarization to demonstrate higher-level analytical writing.	Dominic Abarquez - Panel	2025-12-12	Route 2
				“Despite these insights, little is			

2025-12-12	1	4	1	known about the employment outcomes of graduates from Saint Michael College of Caraga (SMCC)…" I acknowledged the research gap but Precious, it still remains too broad, lacking specificity regarding which employment dimensions (e.g., job alignment, job search duration, salary) are unknown. SMCC guidelines require a precise identification of what is missing in local literature. Strengthening this rationale will clarify why a tracer study is essential for SMCC-CTHM.	Dominic Abarquez - Panel	2025-12-12	Route 2
2025-12-12	1	30	1	"In this study, graduates' profiles… serve as predictors of employability outcomes." The section introduces Human Capital Theory but does not sufficiently explain how each profile variable (age, gender, marital status, etc.)	Dominic Abarquez -	2025-12-12	Route 2

				theoretically influences employability. More explicit connections between the theory's propositions and the study's specific dependent variables would strengthen conceptual alignment.	Panel		
2025-12-12	2	6	1	"According to Romano and Bautista (2025), the BS Hotel and Restaurant Management alumni… belonged to early adulthood age cohort…" The RRL presents individual studies descriptively without grouping them under conceptual themes such as demographic factors, job alignment, or employability predictors. The section would benefit from reorganizing literature into clear themes to improve coherence and better analysis. Okay?	Dominic Abarquez - Panel	2025-12-12	Route 2

2025-12-12	1	2	1	“Food safety and sanitation are public health issues of great concern worldwide… These highlight the importance of proper sanitation and food safety practices in all food establishments, including bakeries.” It moves abruptly from worldwide concerns to bakeries in general without a clear national and local transition. Strengthening the deductive flow by discussing national food safety issues before narrowing down to local bakeries will improve coherence.	Dominic Abarquez - Panel	2025-12-12	Route 2
				“International studies show that similar issues are observed in other countries… In contrast, bakeries implementing HACCP, ISO 22000, and structured cleaning programs showed improved food safety and product quality.” This paragraph contains many studies			

2025-12-12	1	3	1	presented one after another, producing a listing effect rather than a synthesized discussion. You may enhance academic quality by grouping findings into themes such as “common sanitation gaps,” “infrastructure challenges,” and “effective interventions.”	Dominic Abarquez - Panel	2025-12-12	Route 2
2025-12-12	1	4	1	“Despite the availability of studies on food safety across the country, there is no existing research that specifically examines the sanitation and food safety practices of bakeries in Buenavista, Nasipit, and Carmen…” Yes, the research gap is stated but remains broad because it does not specify what aspects of sanitation (e.g., hygiene compliance, equipment handling, facility management) are undocumented. Adding more detail	Dominic Abarquez - Panel	2025-12-12	Route 2

				about the unique operational or regulatory challenges in these municipalities will strengthen the justification.			
2025-12-12	1	5	1	“This study is anchored on the Health Belief Model (HBM)… and the Protection Motivation Theory (PMT). Together, these theories explain how bakery employees implement food safety and sanitation practices…” Although the theories are well described, the paragraph does not explicitly map HBM and PMT constructs to the study variables such as personal hygiene, sanitation practices, and consumer assessment. Strengthening the link between theoretical components (e.g., perceived severity, threat appraisal) and the operational indicators will improve conceptual clarity.	Dominic Abarquez - Panel	2025-12-12	Route 2

2025-12-12	2	6	1	Age Section; “Age influences how individuals understand and apply food safety practices… young ones lacked knowledge of issues of paramount importance…” While this paragraph contains rich literature, it presents findings narratively without consolidating them into clear themes such as “knowledge differences,” “compliance behavior,” or “training responsiveness.” Organizing the RRL into thematic subsections will strengthen readability and conceptual coherence.	Dominic Abarquez - Panel	2025-12-12	Route 2
2025-12-12	1	3	4	It should directly state the research gap, its cause, and why the study must be conducted now. Expand this to clearly justify your study	Ma. Evaliza Del Mar - Adviser	2025-12-12	Route 1
